

OPS GROUP LTD LAUNCHES NEW WEBSITE

In a continuing bid for progression, OPS Group Ltd has introduced a new and improved website in conjunction with their 2008 20th Anniversary celebrations.

OPS Group Ltd believes the development of their online facilities will enhance the existing services offered by the Group. With a more user friendly layout, clients and contractors can navigate easily through the pages to see what OPS Group Ltd can offer.

The existing website has been completely transformed with a new look and dedicated contractor and client pages. Additionally, there is a new page dedicated to jobs: www.opsgrp-jobs.com. All client requirements can now be advertised on the website allowing OPS Group Ltd to reach a wider audience when fulfilling their clients' needs. Contractors can search these jobs by keywords or disciplines and upload their CVs.

Business Development Manager, Bethan Johns, says of the new features: "We are continuously looking for ways to improve services to our clients and contractors. Online facilities are crucial and invaluable in such a global industry and our updated website has immediately improved our potential for sourcing candidates for our clients, and vice versa, on an international scale."

The new website can be accessed using the original web address: www.opsgrp.com.

For further information, please contact Bethan Johns or Louise Friseal on +44 1224 712332.
