OPS GROUP SPONSORS THE SCHOOLS INFORMATION PROGRAM

OPS Group (Australia) Pty Ltd has announced that it is proud to be the Education Sponsor for the Schools Information Program in Western Australia.

The Petroleum Club of Western Australia's Schools Information Program (SIP) is an initiative to raise the awareness of the technical aspects and career options available in the energy industry for Year 10 students. The educational program is offered to approximately 800 students throughout Western Australia.

As SIP Education Sponsors, OPS Group has been invited to judge in the SIP Energy Awareness Project Challenge Final. The challenge involves teams of children working on projects that describe the issues involved in the operations of the upstream petroleum industry, the safety and environmental impact issues and that highlight their understanding of the industry as a career and the opportunities involved.

OPS Group's Asia-Pacific General Manager, Martin Lees (who will be judging the Final on behalf of OPS) is very positive about SIP and OPS Group's involvement: "As newcomers to the WA market, it was an important goal for OPS to become more involved in our local community, the Petroleum Club and the WA energy industry. The Schools Information Program has provided the ideal opportunity for us to do this and I am delighted that OPS is a part of it."

As part of OPS Group's work with the Petroleum Club, the Group sponsored a Petroleum Club dinner in March 2010. Martin Lees introduced OPS Group to the attending members during a short presentation. "Again, this was a real opportunity for us to introduce OPS Group to some key industry players. Our first year of trading in Western Australia has been very successful and we want to keep up that momentum by remaining visible and available to the market."

For more information on either the Petroleum Club of Western Australia or the Schools Information Program, please visit www.petroleumclub.org.au.
